Signature Construction Developments

As a specialist Plumbing and heating company, Signature Construction Developments were contracted to install new Gas Boilers for existing properties in Manchester.

The project involved precision drilling and cutting of double skinned brick walls of various aggregates to accommodate boiler flues at 117mmØ externally on 3 ground-floor properties as part of a 1 month renovation. The work undertaken had to be clean and due to the tight deadlines, needed to be done on time in order to fit with the ongoing project management of the renovation.

Using the combination of the Diaquip QDM-150D Elite Dry Diamond drilling motor with Diaquip K50 Coredrills produced very little noise and dust, and meant that the project was completed ahead of time and within budget.

“Signature have built a great relationship with Diaquip. Their team are friendly, helpful and responsive. We use the QDM-150D and the Dry Cores because they do a great job, are reliable and better than the other diamond coredrill products on the market.”

Taz Rafiq – Signature Construction Developments Limited

MB Heating

Specialist Plumbing and Heating company, MB Heating were contracted to install new gas boilers for new residential development in Wigan. The project involved precision drilling and cutting of double skinned brick walls through various aggregates to accommodate boiler flues at 127mmØ externally for 450+ properties as part of a 18 month new build development project for a major new build property company.

They used both 150mm and 300mm length slotted coredrills. The combination of this along with the power and precision of the QDM-150D Dry Diamond Drilling motor mean that the transmission of vibration, noise and dust was kept to the lowest possible level and the result was a clean, well positioned hole.

The QDM-150D is a powerful well balanced motor, and suitable for use in difficult situation such as confined spaces.

"MB Heating have used Diaquip as our Coredrill and motor supplier for over a year, and I have been hugely impressed by their products and their service. We are delighted with the QDM-150D Elite, it has made our work a lot easier and we find it easy to use, fast and very reliable. Diaquip really know the Diamond Drilling business and I would recommend them highly to anyone."

Paul Griffiths – MB Heating Limited
