Lifetime 'no segment loss' guarantee  
on all Laser Welded Raw Cores\*

\* No Segment Loss Guarantee applies to replacement of Diaquip Laser Welded Raw Core Coredrill with a minimum of 2mm remaining segment - ascertained by Diaquip's Technical Service Division and that the Raw Cores Coredrill was in use solely by the original purchaser for the duration of ownership.

# COMPLETE RELIABILITY

## COMPLETE RELIABILITY

With an unrivalled Diaquip's Max Uptime™ after sales service level backed up by a 2 year warranty, a lifetime ownership guarantee for a next day replacement loan drill with 48 hour service turnaround.

For added control, if you purchase Raw Core Laser Welded Coredrills – Diaquip offer a No Segment Loss Guarantee.

## QDM-350 Case Study (Lee Plant)

### THE CHALLENGE

Lee Plant were commissioned by The Highways Agency to reinstall the central reservation safety fences in the middle of the M65 near Blackburn and Burnley as part of a multi-million pound improvement project.

Hundreds of holes were required (350mm Ø, 650mm depth). Due to the tight deadlines, reliability of the equipment used was also a consideration in avoiding downtime, especially considering that lane closure delays would be costly in terms of lost project time and financial penalties.

### THE SOLUTION

As the M65 Project was such a large scale project with hundreds of large holes required in the road surface (350mm Ø, 650mm depth), Lee Plant used the Diaquip QDM-350 drill motors. Diaquip worked with Lee Plant to find the very best coredrill / segment / rig combination to get the best out of the QDM-350's power and speed, whilst maximising the life of the coredrill.

The service from Diaquip meant that they experienced no downtime from the DQ Machinery. Each QDM-350 is backed by Diaquip's Max Uptime™ Service, with a 2 year warranty and a lifetime ownership guarantee for next working day replacement loan drill.

# COMPLETE QUALITY

## COMPLETE QUALITY

Made from a premium all-metal casing, designed for robustness, durability and cooling in extreme situations, the QDM-350 and QDS Rig Range have been developed with leading concrete cutting professionals to deliver exceptional results at the cutting edge.

## QDM-350 Testimonial (Lee Plant)

"All of the feedback from our drilling operators was that the Diaquip QDM-350 was the best all-round drill motor that they had used. It worked really well on the road surface and on concrete.

Very reliable, very fast and helps to preserve the life of the coredrills. We were also delighted with the service and speed of dispatch for consumables."
