

DIAMOND COREDRILLS

DIAQUIP K50

The K50 coredrill is a professional part of the Diaquip K coredrill range. It is a universal specification that can be used across a wide variety of aggregates and natural stone.

The positioned diamond segment composition along with the twisted rooftop design ensures fast cutting in concrete with heavy steel content, particularly on **low to mid power motors**.

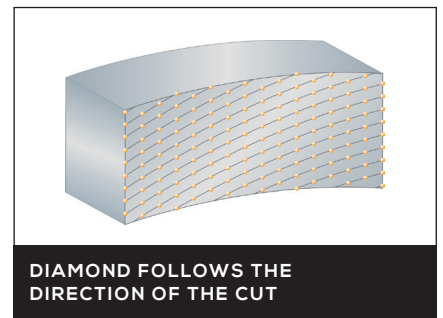

SPECIFICATION DETAILS

- Twisted rooftop design segment makes starting the cut faster and easier
- Ideal for Hand Held motors
- Fast cutting in reinforced concrete and hard materials

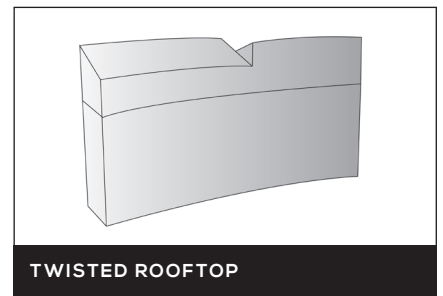

**DIAMOND POSITIONED
IN ALTERNATING LINES**

**DIAMOND FOLLOWS THE
DIRECTION OF THE CUT**
