

DIAQUIP

AT THE CUTTING EDGE

HANDSAW BLADES

MATRIX

The Diaquip Matrix Blade is a professional small diameter diamond blade, for cutting reinforced concrete and general building materials with handsaws and low power floor saws. Incorporating laser welded manufacturing and top quality positioned diamond technology the Matrix is designed to provide an affordable fast cutting blade offering good life and consistency of cut due to the constant presence of sharp diamond on the surface of the segment.

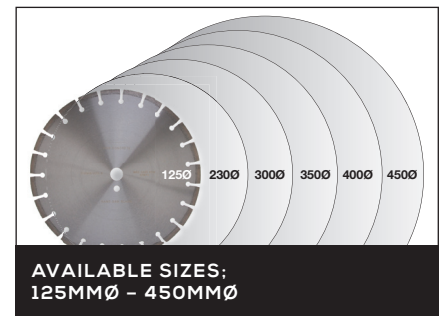

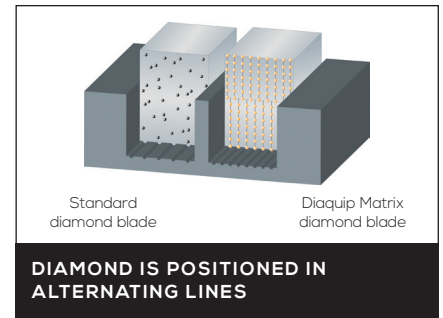

Available in 7 sizes between 125mmØ and 450mmØ – includes a 400mmØ, 4.5mm thick, 'pre-cutting' option.

SPECIFICATION DETAILS

- More speed;** Due to there being a constant presence of newly emerging diamond on the surface of the segment, the segment consistently cuts at maximum speed
- Smoother cut;** with no uneven clumps of diamonds as with conventional diamond segments, the Diaquip Matrix cuts smoothly throughout the full life of the segment

TECHNICAL SPECIFICATION

Product Description	Professional Diamond Handsaw Blade
Application	Fast cutting with good life in reinforced concrete and general building materials
Bore Size	25.4mmØ
Wet/Dry	Can be used for both applications
Diameter Range	125mmØ - 450mmØ
