

DIAMOND COREDRILLS

DIAQUIP AERO CROWN

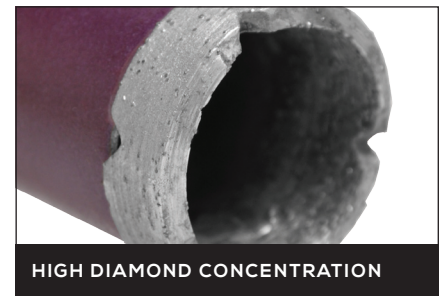

The Aero crown core drill is a high performance consumable that has been proven for universality and exceptional drilling capabilities through steel reinforcement.

To be used for wet drilling, the high concentration of diamond in the crown along with the large diamond grit ensures high speed and high performance in a wide range of materials on most common machines.

SPECIFICATION DETAILS

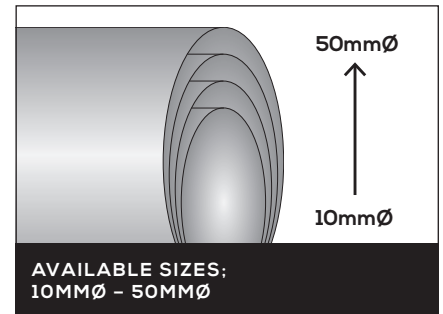

- Bevelled cutting face design makes starting the cut faster and easier
- V-Shape water slots located round the ring ensures efficient slurry removal from the cutting edge

HIGH DIAMOND CONCENTRATION

TECHNICAL SPECIFICATION	
Crown Height	8.5mm
Crown Depth	2.5mm
Size of slot	3mm x 3mm

AVAILABLE SIZES:
10MMØ - 50MMØ
