

## DIAMOND COREDRILLS

### DIAQUIP K CROWN

The K crown coredrill is a wet cutting consumable which has been proven universally throughout the UK and has shown particular strengths on harder materials such as granite.

The U-Shape water slots along with the rooftop design of the continuous rim ensures that slurry is fed away from the cutting edge and cutting is performed as efficiently as possible.

## SPECIFICATION DETAILS

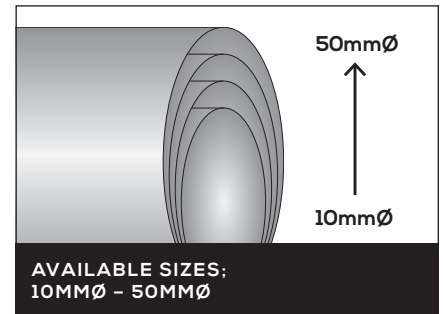

- Rooftop cutting face design makes starting the cut faster and easier
- U-Shape water slots located around the ring ensures efficient slurry removal from the cutting edge

U-SHAPE WATER SLOTS

TECHNICAL SPECIFICATION	
Crown Height	9.5mm
Crown Depth	2.5mm
Size of slot	3mm x 7mm

AVAILABLE SIZES:  
10MMØ - 50MMØ
