

DIAMOND COREDRILLS

DIAQUIP Z CROWN

The Diaquip Z crown coredrill has been proven for wet drilling smaller diameters universally throughout the UK. It is particularly known for its outstanding speed, without compromising on life.

The U-Shape design of the water slots on the continuous rim ensures that slurry is fed away from the cutting edge and cutting is performed as efficiently as possible.

SPECIFICATION DETAILS

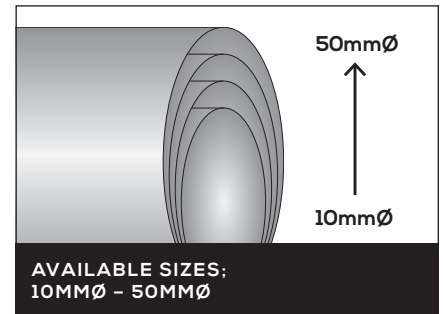

- High grade, tough synthetic diamond quality for very demanding situations
- U-Shape water slots located around the ring ensures efficient slurry removal from the cutting edge

U-SHAPE WATER SLOTS

TECHNICAL SPECIFICATION	
Crown Height	10mm
Crown Depth	2.5mm
Size of slot	6mm x 4mm

AVAILABLE SIZES:
10MMØ - 50MMØ
